Winning is in our DNA. Victory is our attitude.

Laying a solid base for
a lifetime of learning

Sri Bomma Rajeswara Rao, Chairman
Bomma Group of Institutions

Sri Bomma Laxmi Rajyam
Treasurer

As the head of the Bomma School I believe in the popular saying today's children are tomorrow's citizens and leaders. It is the duty of the management to ensure steps are taken to cultivate excellence is an exacting science with a human face. So for the first day of schooling careful long term planning is crucial for every student and parent. We believe all of us-parents, teachers and other well-wishers must work on the common goal of producing students with exceptional capabilities who are the pride of the society. The proper ambience makes the difference. Therefore our teaching is free of tension or pressures to the young minds. So that they can shape up into global leaders. We are sure our 4th year will be backed by the mammoth goodwill and trust of all our well wishers – parents, faculty and many others as always.

As the leading day cum residential school in Khammam we are glad but at the same time committed to face the emerging challenges with strength. Being the only school in Khammam with a swimming pool and a skating ring makes us unique in the eyes of the parents. Our well-balanced academic year can provides students can have access to internet through wi-fi from anywhere in the campus. What is more, our sophisticated computer lab is supported by ample stand-by power. Our low student teacher ratio of 1:25 means effective teaching. Our approach to inculcate the latest advances like interactive teaching skills in more students to involve in the studies. Overall, we are moving forward towards the era of integrated learning-an experience employing multi streams of technology.

Pre-Primary

Enjoying schooling makes
smiling students

Pre-Primary: Whiz Kids

Small children are remarkable creatures to witness. They ooze innocence and attract our interest. They belong to a unique category. Their world comprises of many dreams which they weave with fancy and pursue them with purposeful zeal. It is this curious mind-set that enables them to reach out and make world of their own. Schooling is a part of growing up for everyone. All of us remembers our first days in school throughout our life in a delightful kind of a way. Because it is at this stage that we make our first contact with the world outside the security of our dearest homes. After studying the educational needs of children in the pre-primary level and incorporating the recommendations of many pre-schooling experts, we have designed an optimum programme Whiz Kids which delivers results and more importantly removes all clues of a burden on the tiny minds. In addition, it shapes the toddlers in a fun way. Reason why we use 'playing and fun based routes' to teach concepts, numbers, colours and so on. This way they study with keenness.

Since our motto is to provide the budding scholars the best resources to grow upon and give them a memorable experience called schooling to remember throughout their lifetime. So, when you visit us to know more, you will convince yourself your child's positive progress will happen because it is in safe hands. You can witness the fact that between our pre-primary teachers a close and growing bond exists which makes the teaching enriching and wholesome.

A smile on the face and a challenge
in the mind

Primary:

After the end of the initial pre-primary juncture, the small child is ready to know and explore the world. The fun and playing of the earlier phase are replaced by self-awareness drives. We encourage students to cultivate the habit of asking questions about everything and place. This curiosity when lighted grows into a large base of knowledge which powers personal development. We follow a unique blend of the Montessori system and inculcate a healthy orientation in Indian culture and timeless human values where are intrinsic to our tradition. Digital classes are conducted in an easy to comprehend. In addition our students are introduced to the 'ABL' Activity Based Learning

A lot of thought has come into designing the specific syllabus for the Primary class students so that their overall development happens - Whether it is physical, mental, intellectual skills in addition to language, social and emotional aspects. Field visits are an integral part of the primary classes. In short, a comprehensive plan to groom the young minds with right orientation and proper outlook.

High School:
Foundation courses - Real strength to face today's competition
The high school is the final stage of schooling and the student is mature enough to select a future pathway. Whether it is sciences, or in arts or the study of humanities. These days, the competition being what it is, every student is on the sword edge in terms of preparations and gathering knowledge from many sources. Smart decisions are calling for. Time planning is very important. Speed of execution is a vital skill.

Groomed to face challenges
with success

The keen look on the face of our high school is unmistakable. Their intent to not just to do well but to emerge the topper of the batch is oblivious. We put selected students through an intensive training and coaching sessions, give them exhaustive workouts with actual question papers from the previous years to equip them with speed skills necessary for success in the exam hall. For interested and keen students we offer IIT and Medicine apart to civil foundation course. Our programmes are specially formulated after a lot of research into previous examination patterns. Our experts and teachers help us design courseware with ensure optimum results for the sincere students who prepare hard.

Computers lab - where Information Technology awareness starts

Pre-Primary: Whiz Kids

This is the 'Age of the Chip'. Everyone from the humble hawker in the street to the stock broker and the election specialist is equipped with that edge. People from all walks of life are benefiting from the IT touch! Those equipped with a keyboard and laptop has transformed their lives beyond compare! They live in a world there the difference between the day and night is not there. It is a 24/7 reality where everything is available at the fingertip! Computer professionals in India struggle throughout the night time to produce solutions for a global audience. These are sent to overseas clients by the break of the day. Reason why we prepare our students to face and fit in the rapidly changing world with ease. So that our students can stride the scene with success everywhere.

They practice on computer lab equipped with state-of-the-art systems.

We provide students with best infrastructure facilities like 3 spacious, full fledged computer labs almost spread over more than one lakh s.ft. These are equipped with state-of-the-art systems like :

- Intel Core 2 Duo 3.00 GHZ processor systems
- 17" LCD Monitors
- LCD projectors
- Laser printers and scanners
- Local Area Network (LAN) with High End Servers.
- 10 Mbps dedicated Internet for high speed downloads
- ASTM Digital Library (DI)

Science Labs:

The evolution of Man and the progress of science are interconnected. Throughout the ages, human beings have been powered by the quest to explore and search for new solutions. One success led to another and the process resulted in delivering a better standard of living for all. This can be seen in various aspects of modern life. Modern medicine has succeeded to control many illnesses. Even cancer is being fought aggressively. Against this background, our science labs represent a fertile ground for students to experiment and try out processes. They are well - equipped and manned by capable faculty.

Science lab-Alive with
real action

Going beyond mere academics, we provide students the practical touch through our well equipped science lab where all facilities are available for experiments. A month of dull lectures is equal to one class of experimentation. In addition, on- the-spot clearance of doubts helped the students immensely.

- Large rooms and spacious halls of 750 s.ft each
- Clean, tidy, hygienic areas with lots of natural air and sunlight.
- Classrooms are more spacious for seating and movement of 60 students comfortably.
- Overhead projectors and other utility items
- 8 outsized Seminar Halls

In short, a complete universe to explore, invade and conquer!

Swimmingpool & Scating

Being oriented towards the total development of the student's personality, we lay proper emphasis on physical strength and stamina. To implement our sports programme we have a full time staff both at the working level and the management levels. A rugged practice regimen is in place. Experienced coaches, winners of international sports awards and sports officials are invited from time to time to address our students and motivate them. We completely believe that every student must be giving the chance to develop into a complete personality. No knows, the next crop of sports legends can feature some of our alumni.

Only studies make students life
dull and boring

What many others just promise, we provide without fanfare. Someone who is active and strong on the playing field. Reason why we provide sufficient sport and games facilities. These include the following disciplines - karate, cricket, volleyball, football and more such sports.

Playground:

The school have open play grounds to play Cricket, Volleyball, Tennikoit, Badminton. All the sports kits needed to play indoor games such as Caroms, Chess Tennikoit are there etc. There is regular sports meet in every year.

In addition to combat the problem of stress related to preparation for exams, anti- dotes like yoga and meditation are taught.

Music & Dance

The profile of the student today has changed beyond imagination. Getting mere top marks in academics is not enough. Various streams must be pursued without a break. Know more. Project bigger is the mantra of success. Requires multiple strengths and very busy activities. The work schedules must burst at the seam. The emphasis is on all-round progress in the short time possible. In addition, now students are chasing wild ambitions without a gap to thinking. All this requires re-focus on priorities. Reason why our students are taught the time saving tips regularly. Music or theater, painting or playing chess our expert faculty is at hands to help.

Spotting the born musician or dancer

musician or dancer

To discover cultural and artistic talents among students, music, dance and painting lessons are conducted as part of the academic routine. We employ seasoned music teachers for the purpose. The whole training happens in the traditional guru-shishya relationship. We have plans to extend active support for youth music festivals. The idea is to transform culture into a vibrant scene in the campus, into which students can hide or emerge later as a stage celebrity.

Convenient hostel facilities to please
residential student

Hostel and Bus Facilities

These hostels are housed in newly systematically constructed R.C.C. Buildings. Watchmen and Matrons are there round the clock in each and every Hostel. Utmost care is being taken particularly in Girls Hostel. Delicious food prepared in Hygienic condition and purified water is being served to keep the students strong & healthy.

We provide out-of-town students with affordable hostel accommodation. The delicious and changing menu is liked by the students. So good some students forget their native places. In the presence of experienced staff, special study hours are conducted for the benefit of the students. Our own mineral water plant and solar water heaters reflect our eco consciousness.

Safe and easy transport facility is provided to students to reach the school on time from neighborhood areas of town Khammam. The aim of providing easy transportation to students is to remove the hassles of reaching the school on time for the lessons and classes. We are aware of the struggles students are facing in attending school without a holiday. This is a reflection of the student's commitment to go to school and study. Because of lack of bus services, high cost and other hindrances coming in the way of realizing the education dream. Reason why we operate a fleet of well maintained, own buses. Some of these buses are reserved to ply on longer routes. These clean buses are well maintained by experienced drivers known for their safe track record.
